30th January, 19.

Dear Sir,

ATG® categorically denies the allegations and fervently disagrees with the assertions made by the trade unions FTZ & GSE on labour relations of the company and factories. These allegations are patently false. It was only after sustained disruption at ATG Ceylon and an enquiry that lasted two and a half years that the 5 employees were dismissed. We understand that this came as a surprise to their fellow workers but their behavior didn't leave the management of ATG® any other choice.

ATG® will, as always, continue to reinforce the dialogue with workers and employee representatives through the workers' council and daily contacts on the shop floor. We will intensify these conversations to make it clear that ATG®'s priority is the wellbeing of our workers. Indeed, ATG® has always strived to create a fair work environment for employees at all levels not least the high highest paid workers and the highest 2019 salary increase in the Katunayake Zone and believes this passion is reflected in the products we produce and the high levels of staff retention.

Your Sincerely

John Taylor, Chairman

For and on behalf of the Board of Directors
