China’s activists exposing the fashion industry’s hypocrisy

**GARMENT WORKERS FIGHT BACK!**

10 million garment workers in China work for up to 20 hours a day, for poverty pay, in deplorable factory conditions.

While garment workers struggle for their right to decent work, brands that line the UK high street boast billions in profit and evade responsibility for the human rights abuses entrenched in their factories.

But against all odds, workers are fighting back.

Students and Scholars Against Corporate Misbehaviour (SACOM) and Worker Empowerment have made extraordinary leaps forward in exposing the impunity enjoyed by fashion brands. Through undercover factory investigations and educating workers in mainland China, War on Want’s partners are part of a resilient movement for change.
